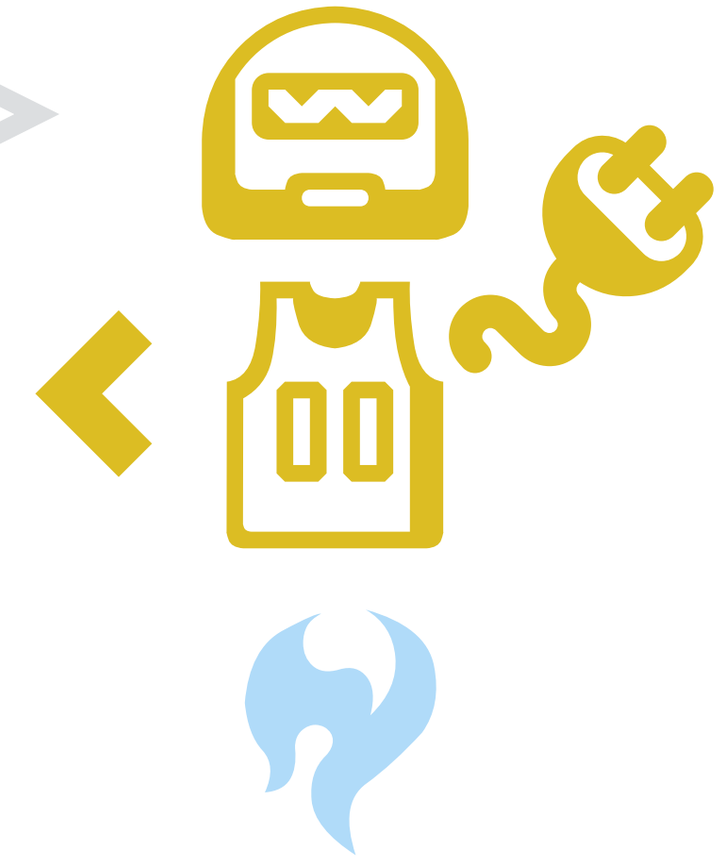
測試沒過，
不給你 deploy。



muan
/where can i deploy

Hubot

```
Environments for github
-----------------------------------------------------------------------
production: unlocked
garage: locked 17 hours ago by bkeepers: testing the "drop-rails2-support" branch
lab: unlocked
machine-room: locked 11 hours ago by jakedouglas: testing the "fix_starwatchers_over_page" branch
spider-skull-island: unlocked

The queue for production is empty.

branch-lab is always available: /deploy github/my-branch to branch-lab, /branch-lab list, /branch-lab rem
```

muan
/deploy github/muan/invoice-report

Hubot

```
muan: Trying to deploy a branch to production? Please say "/deploy github/muan/invoice-report to
production".
```

muan
no
damn
right
thanks hubot
/deploy github/muan/invoice-report to branch-lab

danbing
Stale selectors and partials
These classes are no where to be found:
.avatar-upload-label
.billing-extra-yolo
.login-form-fixed

danbing

Deep selectors

These selectors are too damn complicated:

```
#adv_code_search .enterprise .site-search .search-page-l
body.page-profile .profilecols .tabnav .pagehead-actions
.discussion-hidden .timeline-comment-content .timeline-c
.prose-diff > .markdown-body li .wraps-task-list-item-ch
```

Special prefixed classes

Stylesheets should not contain js- prefixed classes:

```
.js-avatar-uploader
.js-prorated-for-days
.js-branch-name-suggestion
```

Special prefixed classes

Stylesheets should not contain js- prefixed classes:

```
.js-avatar-uploader
.js-prorated-for-days
.js-branch-name-suggestion
```

```
git grep -n '[#.]js-' -- app/assets/stylesheets
```

danbing

The ALT attribute

⚠️ Missing alt attribute on <img src="logo.png">

```
if(!img.hasAttribute('alt')) {
  console.warn(“Missing alt attribute on", img)
}
```

danbing

label.control

⚠️ Label missing control <label>Query</label>

```
if(!label.control) {
  console.warn("Label missing control”, label)
}
```

<a>/anchor tag declaration

```
⚠ Missing href or role=button on link
  <a class="hw-clear-interests js-hw-clear-interests
  again</a>
```

```
if(!this.getAttribute("href") ||
   !this.getAttribute("role") == “button") {
  console.warn("Missing link declaration", link)
}
```

Accessible text – aria-label

```
⚠️ Missing href or role=button on link
   <a class="hw-clear-interests js-hw-clear-interests
   again</a>
```

```
   text  = node.innerText
   text += node.getAttribute(‘alt')
   text += node.getAttribute(‘aria-label')

   if(text.length == 0) {
     console.warn("Missing accessible text", this)
   }
```
